Submitted values are:

Should there be a total cap on STRs in the unincorporated county?

Yes

Should STRs be capped based on the ratio of STRs to the total number of dwellings in a zoning district? (Example: No more than 10% of dwellings can be STRs)

Yes

Should existing permitted STRs be grandfathered in?

No

Additional comments

I feel that STR's should be required to meet current standards to continue to operate in unincorporated areas, just as they are held to standards under municipal jurisdiction. It is up to the board of commissioners to determine what acceptable standards to establish (i.e. septic systems, water use, off-street parking, etc) in communities and residences located in areas not under municipal jurisdiction.

Additional comments

I now have three STRs touching my property, making my neighborhood and home less 'homey'. When there are problems (l.e.noise) whom do I call that will actually respond and take care of the issue? If there are fines levied, they need to be more in balance with the large rental fees these people are getting.

Additional comments

I do not want any STR's in our neighborhood. It is always the cause of stress and problems. Renters don't care because they are only there for the weekend. They don't need to be a good neighbor because they wave on Sunday

Additional comments

Short term vacation rentals are essentially small motels located in single family neighborhoods. The Comprehensive Plans by cities and the county did not anticipate or allow short term vacation rental use. Vacation rentals destroy the good neighborhood characteristics of a community and it is a use which at best should be confined to commercial or motel zones. Cannon Beach is a classic example of a popular residential community who's charm and character have been adversely affected by short term rentals.

It is sad that the county and cities appear to "regulate" a non-conforming use only for the revenue they generate and ignore the purpose for single family zoning.
