Interstate Compact

What is ICOTS?

The Interstate Compact Offender Tracking System (ICOTS) is the nationwide electronic information system of the Interstate Commission for Adult Offender Supervision (ICAOS). The system is used by all states to track offenders who are authorized to travel or relocate across state lines. The system is also used to share information regarding offender movement under the rules of the interstate compact. For more information on the Interstate Commission for Adult Offender Supervision, visit the web site at www.interstatecompact.org.

ICOTS Public Web Portal: This Web site allows the public to search for information about offenders who have transferred supervision to another state or are in another state with permission while the transfer of supervision is under consideration. Link: Interstate Compact Web Portal
