

Public Works Facility Relocation Project

Public Works Facility Relocation Project

(Formerly known as **Public Works Resiliency Project**)

Latest Update: July 16, 2021

The consulting firm of Mackenzie has prepared the **DRAFT Report** on the Public Works Facility Needs Assessment. This report has been finalized and presented at the **July 14th work session beginning at 5pm.**

Clatsop County selected Mackenzie to develop a new replacement facility for the Public Works Department. The replacement facility has been designed in an effort to better meet the Clatsop County Public Works Department's needs and goals; provide a facility out of the flood inundation zone and on the south side of the rivers; provide a more efficient operational model and layout; better align with current space demand for the Department; and allow for future staff, facility growth and operational changes.
